

Get started writing a Data Management and Sharing Plan (DMSP)

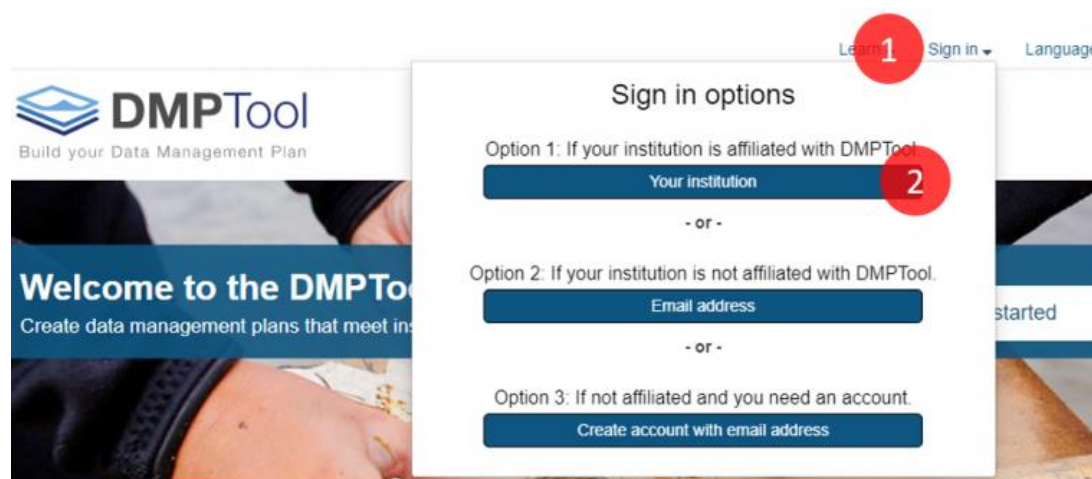

The DMPTool is an online system that helps you create data management plans in accordance with NIH guidelines.

Optionally use the [DMPTool](#) (create an account and log in).

Getting Access

To log in to the tool, go to [DMPTool.org](#) and log in by (1) clicking Sign In, and (2) selecting the institutional log in option as shown below. You can then log in with your NetID.

Sample Templates:

Generic Sample DMSP Template provided by the NIH

This [DMSP template](#) is provided by Arcus for the benefit of the research community. This [sample](#) of a vetted DMPs from a successful proposal is provided by NIH.

Please do not copy text from these DMPs verbatim into your own DMP.

Sample DMSP Template for Arcus Data Use

We have created an [example](#) of a DMSP template for use with Arcus data.
