

# WHAT ARE GERMS?

Germs sometimes can make us sick. Four major types of germs are bacteria, viruses, fungi, and protozoa.  
**Color the different types of germs.**

Children's Hospital of Philadelphia Research Institute continues its groundbreaking research on numerous diseases and disorders that effect children. Without families and individuals like you to participate in research, many breakthroughs would not be possible. **Scan the QR code on the left to sign up to our Research Participant Registry. Questions? E-mail the Recruitment Enhancement Core at [participantrecruitme@email.chop.edu](mailto:participantrecruitme@email.chop.edu) or call 267-426-6846.**

# GERM PREVENTION

Germs are so small they can only be seen with a microscope, but you can still help stop them from spreading. Catch your sneeze or cough with your elbow or tissue, wash your hands, and even wear a mask. **Draw a line from the picture to the matching sentence.**

Wear a mask.

Cover your mouth.

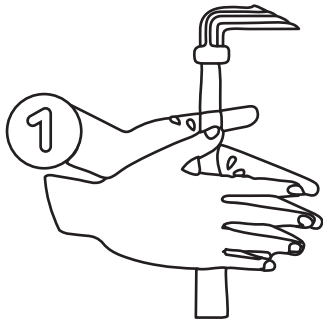

Wash your hands.

# WASH YOUR HANDS

When we protect ourselves from germs, we help keep everyone healthy. **Follow these eight steps when washing your hands:**

**Wet Your Hands  
with Water**

**Add Soap**

**Create a Lather**

**Interlace  
Fingers**

**Wash Thumbs**

**Don't Forget  
your Wrists**

**Rinse**

**Dry Hands**
