

TRANSGENIC CORE

Comparison of Barrier Housing – CHOP vs. PSOM

CHOP Core - CHOP Barrier Housing

Microinjection fee: \$3,217 (All CHOP/PSOM Faculty)

~2 weeks: Request to completed procedure

6-7 weeks: Gestation and weaning

1 week: Mice transferred to PI's room for breeding and procedures

Total Cost: \$3,217

Total Time: 9-10 weeks

Age of Mice: 4 weeks

PSOM Core - CHOP Barrier Housing

Microinjection fee: \$3,260 (CHOP/PSOM Faculty)
or \$1,630 (CHOP/PSOM Faculty from Centers)

~12 weeks: Request to completed procedure

6-7 weeks: Gestation and weaning

2 weeks: Transfer mice to CHOP Quarantine

- Contingent on space
- \$180

6 weeks: CHOP Quarantine Period

- \$400 - \$500 Pathology testing
- \$1.21/cage/day (if 2 cages transferred this would cost \$102)
- No access to mice
- Breeding and tail snip collection by DVR possible if space
- Additional service fee

9 weeks: ARC Conventional housing while being rederived

- Breeding and genotyping not allowed
- \$0.98/cage/day

9 weeks: Rederivation into CHOP Barrier

- \$1,639

1 week: Mice transferred to PI's room for breeding and procedures

Total Cost: \$5,681 +per diem or \$4,051 + per diem

Total Time: 45-48 weeks

Age of Mice: 4 weeks
