

PATHOLOGY CORE

General Histology

We provide services for both CHOP and external researchers. The core offers a full range of histopathology services including the following:

- Tissue Processing and Embedding
- Paraffin and Frozen Tissue Sectioning
- H&E and most standard Histochemical Stains
- Immunohistochemistry/Immunofluorescence staining included assistance with working up and validating new antibodies and staining protocols
- Access to a Leica DM4000 B microscope at SPOT R/T slider camera for imaging both bright field and fluorescent slides
